EQUINIX CLOUD EXCHANGE FABRIC™

Flexible, on-demand, global interconnection

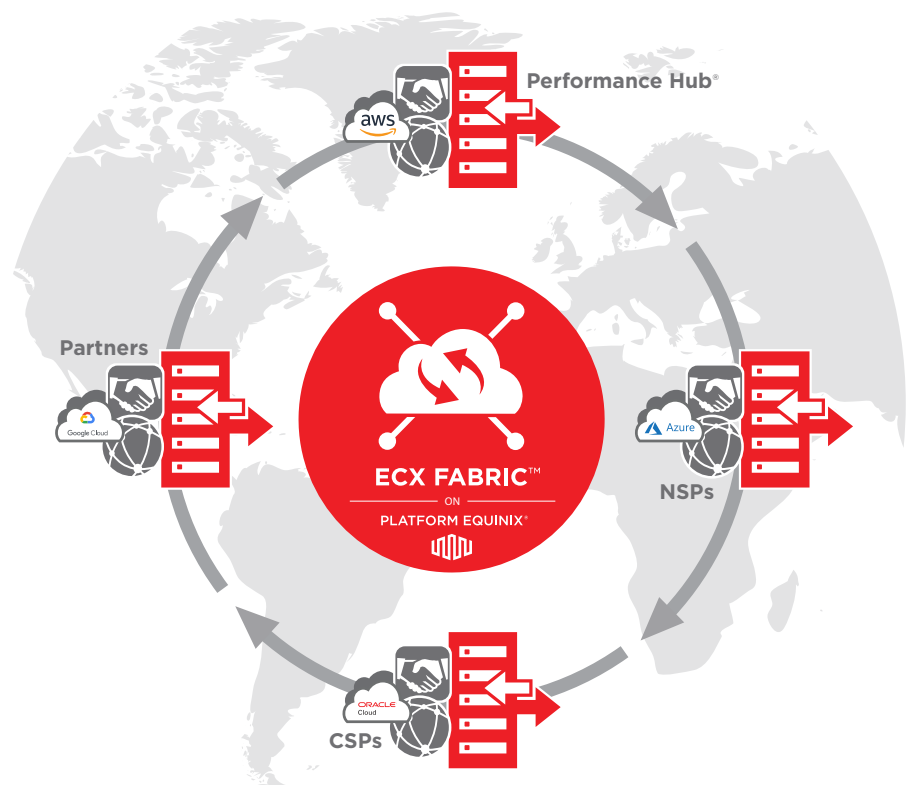

Our global platform for digital business, Platform Equinix®, is where businesses come together with the world's largest ecosystems of interconnected partners and providers to accelerate digital transformation. Break through old IT constraints to find, share and deliver value in new ways, through one connection to the world.

Equinix Cloud Exchange Fabric™ (ECX Fabric™) directly, securely and dynamically connects distributed infrastructure and digital ecosystems on Platform Equinix via global, software-defined interconnection. Available across 35+ locations, ECX Fabric is designed for scalability, agility and connectivity over a self-service portal or API. Through a single portal, discover and reach anyone on demand, within a metro or globally, to drive your digital future forward.

Benefits

- **Flexibility**—Pay only for what you use, without restrictive contract terms or a lengthy procurement process.
- **On-demand connections**—Quickly create connections to top cloud, network and security providers, or between your Platform Equinix data centers in just minutes via self-service portal or APIs.
- **Ecosystems**—Globally interconnect to dense ecosystems of cloud, networks, financial services, content and digital media, and entertainment companies. Access the highest concentration of major providers, including AWS, Google Cloud, Microsoft Azure, Oracle Cloud and IBM Cloud.
- **Scalability**—Geographically scalable connectivity to 35+ markets, enabling global interconnection between 150+ IBX data centers.

ECX FABRIC

Use cases

- **Network optimization**—Localize and optimize traffic by integrating your infrastructure, cloud and IT services and security across multiple metros.
- **Hybrid multicloud**—Simplify your IT by directly connecting to multiple clouds, in multiple metros, through a software-defined portal.
- **Distributed security**—Build a more secure and distributed IT architecture by deploying private connections, bypassing the public internet.
- **Distributed data**—Disaggregate IT resources and connect between them at the edge for improved end-user experience.

Technical Specifications

ECX Fabric Port

Includes cross connect cable from customer cage to ECX Fabric Port

Media type supported

- 1G SX multi-mode fiber*.
- 1G LX single-mode fiber.
- 10G LR single-mode fiber.

Connection speeds**

- Up to 50 MB.
- Up to 200 MB.
- Up to 500 MB.
- Up to 1 Gb.
- Up to 10 Gb.

Connection options

- Connect to any ECX Fabric participant within a metro or globally.
- Multiple connection speeds depending on the destination.

SLA

Availability SLA:

- 99.999% (dual ports).
- 99.9% (single port).

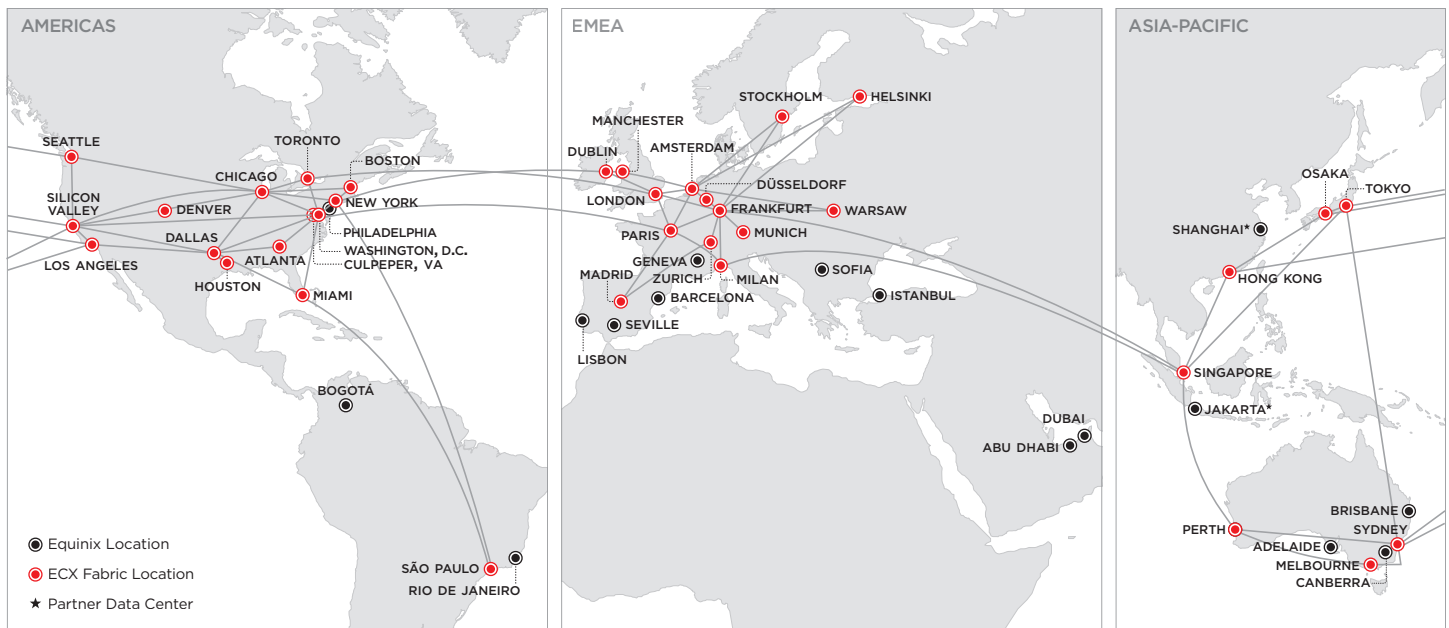

*Not available at all locations in EMEA and AP.

**Connection speed options may vary by service provider.
