

# ANTIMICROBIAL

Antimicrobial technology can be incorporated into interiors in a variety of ways which inhibits the growth of bacteria. Antimicrobial technology can be introduced in interiors in a variety of ways though textiles, hard surfaces, paints and so much more. Furniture life within healthcare, education, food & beverage, and senior living applications can be prolonged by utilizing antimicrobial textiles! Antimicrobial technology is not only effective against bacteria and microbes but also mold, mildew and fungi.

AIS has partnered with Applied Textiles providing us with Alta.

## Haven't heard of Alta before?

Alta is an award-winning fabric technology designed to deliver the highest level of protection for any application. Alta can apply a zinc based to fabrics to achieve >99.9% bacterial reduction, which does not change the hand of the fabric, and best of all is environmentally friendly!
