

FastTrack Program

Get over \$100k in value of fully operational lab space

Receive 3 Lab Benches for the Price of 1

Program Details

With FastTrack, qualified companies receive three fully supported lab benches for the price of one, along with 1 year of membership at Labshares.

The program includes dedicated desks for up to three team members, access to over \$10M in shared equipment, cold and dry storage, and a full suite of backend laboratory services.

What You'll Have Access To:

- ✓ \$10M in shared equipment
- ✓ Full suite of operational lab support
- ✓ Dedicated office and conference room space
- ✓ Free parking for all members
- ✓ Onsite gym, bike storage, and café

Frequently Asked Questions

Who is this program designed for?

This offer is for biotechs with 2+ full-time scientists and \$3M+ in committed funding who need immediate, high-quality bench space without the cost and time of building their own lab.

What's included in the three benches?

Your package includes:

- Three lab benches
- Dedicated office desks for your FTEs
- -80°C, -20°C, 4°C, and LN2 cold storage
- Access to \$10M in shared equipment, tissue culture, lentiviral and microscopy suites
- EHS, waste handling, and common infrastructure

Can I see the space before I commit?

Yes! We are always happy to accommodate your team onsite for a tour. We want to ensure you feel Labshares is the right home for your company.

What's the next step if I'm interested?

There is a short form to fill out that is attached. Once we have your submission, we will schedule a call with your team to review your company and fit within our space.

How long is this program running for?

The FastTrack program begins January 2026 and runs through July 2026

What are the criteria to apply?

- \$3M+ in funding
- 2+ FTEs
- Biotech/Life science company

How soon can we move in?

As soon as you're ready! We have benches available and no lengthy application or onboarding process. Most teams are able to start experiments within 5–7 days.

What if we need more space?

We always promote scaling up and growing for our members. As a current member, you will be given priority to new space coming available should you need to grow.

What shared equipment is available?

We maintain over \$10M in shared equipment, including:

- TC hoods & incubators
- dPCR/qPCR
- Advanced imaging
- Flow cytometry
- Cell sorting
- UHPLC
- Plate readers
- Centrifugation and sample prep tools

Equipment list is available on request.

Can I bring in my own equipment?

Yes!
